

Chapter 8

A variety of road hazard equipment to ensure the safety of workers, road users and pedestrians. All follow recent government safety legislations.

ROADSIGN SAFETY

Without proper signs and barriers, street and road markings are potentially dangerous, which is why the New Roads and Street Works Act 1991 (Chapter 8) specifies the precautions you must take to protect workers, pedestrians and road users.

A copy of the Safety & Street Works & Road Works code of practice is available from HMSO bookshops.

Road works safety equipment

A range of road safety equipment for all site and road works, conforms to the New Roads and Street Works Act. All barrier boards (2 metres in length) are rated to Class 2 (D2) and are faced with scotchlite reflective material. Cones (750mm) have three slots to take lower barrier boards and are made from thermoplastic material.

weekly min hire rate

20001	Road Barrier Planks 2m	£3.30
